## Features

## Software Installation

In order to use the Polycom CX400 Cordless Phone, Microsoft® Office Communicator 2007 must be installed on your computer. No additional drivers or software are required.

Contact your system administrator for any issues related to the Microsoft Office Communicator 2007 client application on your computer.

## Connect Cradle

To connect the cradle, plug the retractable USB cable (attached to the cradle) into a USB port on your computer. Your computer will detect the new hardware and configure it for use with Microsoft Office Communicator 2007.

To charge the batteries in the handset:

1. Remove the battery cover, and insert the rechargeable battery into the back of the phone.

## Startup

To turn on the handset, press and hold Power On key for at least three seconds until the display appears. The Handset Status LED will be solid green. The display will show your account name and your presence state. The cradle connection LED will appear solid green when the handset is turned on and there is radio link between the cradle and the handset. To ensure that the Speakerphone mode works as intended, go to the "Setup Audio and Video..." wizard under the "Tools" menu in Microsoft Office Communicator 2007 on your computer. On the "Speaker/Microphone or Speakerphone" page, select your computer's sound card for the speaker and the Polycom CX400 for the microphone (you may need to select "Custom" in the top text box first).
